

CSNO Bay Coast Fall Conference

October 17th 2026

8:00 AM – 3:30 PM

Location: Michael's At Shoreline Golf Links

2940 N Shoreline Blvd

Mountain View, CA 94043

Session 1 Information:

Every day, students come to school carrying unique health needs—some of which aren't visible. Blood disorders such as anemia, sickle cell, hemophilia can affect a child's energy, safety, and ability to participate fully in school life. This presentation provides school nurses with evidence-based guidance to identify symptoms, implement individualized health plans, and respond effectively to both routine and emergent situations and will be led by **Katrina Unpingco, MSN, FNP-C**, a nurse practitioner specializing in the care of children with noncancerous blood disorders. Her clinical focus includes **bleeding disorders** such as hemophilia and von Willebrand disease. By strengthening our clinical practice, we ensure that every student receives safe, equitable, and informed care.

Session 2 Information:

Epilepsy is one of the most common neurological conditions affecting children, and school nurses play a vital role in ensuring safe, informed, and coordinated care for students living with seizure disorders. This presentation will be led by **Professor Mona Sazgar MD Department of Neurology, UC Irvine School of Medicine**, a board-certified neurologist and epilepsy specialist whose clinical and academic work focuses on advancing evidence-based care for individuals with complex seizure conditions.

This session will equip school nurses with the clinical knowledge and practical strategies needed to recognize seizure types, respond effectively to emergencies, support individualized health plans, and collaborate with families and providers. Strengthening our understanding of epilepsy ensures safer schools and more equitable care for every student.

Agenda:

8:00 AM - 8:30 AM Registration/Breakfast

8:30 AM - 9:00 AM Sponsor Presentation by RO Health

9:00 AM - 11:10 AM Session 1: Blood disorders presented by **Katrina Unpingco, MSN, FNP-C**
